Letter of Recommendation for  
Tightline Construction &  
Adam Wilson

We strongly recommend Adam and his team to be your choice for framing when it comes to your custom home;

1. Adam's attention to detail in terms of both "reading" the plan and turning the plan into reality is amazing. He found many details on the plan that we as home owners had overlooked-- even after many hours of studying the plan.
2. On our "walk out basement home" Adam used a laser when cutting the 2x6 studs to make sure every wall was perfectly level and square. This made every sub trades job that followed much easier.
3. Adam and his team showed up promptly at 7:30 every workday. They were never deterred by rain, snow or sleet. Every day there was progress leading to our dream house.
4. Adam's understanding of Math and Trigonometry enabled him to get it right the 1st. time. Complex angles, etc. presented no problem for his team.
5. Adam's billing is honest and we found no surprises in the change orders on things we asked Adam's team to do.

In conclusion, if you give Adam a chance to take care of your framing needs-- you will come out of this process wanting to write Adam and his team a letter just like this one. Feel free to call us if you have any questions and if you like, we can even email you photos of our dream home as it progressed.

Sincerely,

Bill and Dagmar Francis  
Bellingham, WA
